Professional Summary

Software development graduate who spent eight years repairing PCs and mobile devices, while helping run a local computer shop. Builds web apps and IoT systems. Looking for a software development role.

Key skills

- **Software**: JavaScript, Vue, React, Node.js, PHP, Python, C/C++, SQL, HTML/CSS, MongoDB, Express
- **Hardware and IoT**: PC and laptop repair, fault diagnosis, Arduino, MQTT, Modbus, Zigbee, LoRaWAN, 3D printing + Fusion 360
- **Tools**: Git, Azure DevOps, Jira, Confluence, Docker, AWS, Keycloak, Figma, Firebase

Education

- **Bachelor of Computer Science - Software Development**, Swinburne University, May 2026. GPA 3.556/4.0
- **Diploma of Information Technology (UniLink)**, Swinburne University, 2017. GPA 3.625 / 4.000

Experience

CTRL Accounting: Lead developer / Director (20%)

Remote | 2023–present

- Built CTRL Centre, an online tax return app. Clients fill in their return and pay in one place, and tax agents review it in a separate workspace. Stack: Vue 3, Node.js, Express, MongoDB.
- Return contents are encrypted in the browser, so only the tax agent can open them. The server stores them but can't read them.
- Sign-in uses passkeys or password plus 2FA through Keycloak. Stripe handles payments and ID checks.
- Wrote 179 automated tests. Now preparing for launch.

Powelltown Sawmills (now Timbermaster): Sawmill Stacker (casual)

Powelltown | 2023–2025

- Stacked timber and helped with equipment maintenance.
- Fixed up parts of the old Access database and data-entry portal, and added site-to-site stock transition support.

Technology2You IT Services: Computer Technician / Shop Manager / Web Developer (Part-time)

Woori Yallock | 2014–2022

- Repaired PCs, laptops and mobile devices for walk-in customers: failed drives, overheating, RAM and power supply faults, virus removal, data recovery.
- Ran the shop when needed: opening and closing, ordering parts, booking jobs.
- Explained faults and costs to customers who weren't technical.
- Built and looked after WordPress sites for 5+ local clients, including the CEO’s online store with dynamic inventory via JSON data feeds.

Projects

SmartCity Dashboard - capstone for an industry client in IoT security

- Team of five. A dashboard that monitors IoT devices and flags anything unusual.
- Takes data over MQTT, CoAP, Modbus, Zigbee and LoRaWAN. Built with Vue 3, Node.js, PostgreSQL, Python and Docker.
- Anomaly detection (Isolation Forest) flagged about 4.8% of records on the public TON_IoT dataset.
- Set up CI/CD with Azure DevOps, then deployed on AWS for a containerised demo on an EC2 server.

Polktronics: Auto Electrical Assistant | *volunteer*
Woori Yallock | 2018–2019

- Assisted with upgrades to SES vehicle equipment: fitting new CB radio equipment.

EquiScore Dressage Scoring: Lead Developer – *Unpaid project*
Woori Yallock | 2017–2019

- Built an online scoring and results portal in PHP, JavaScript and Ajax.
